was not speaking his own language. He was only addressing those who did entertain some such fear; and he said that as long as trades' unions were without the pale of the Constitution, there was some fear of their becoming engines of agitation; but put them within the constitution and the working man would not look to trades'

very much respect, who told them that working might lead to Parliament debates of this sort of

MEETING OF LIBERAL MEMBERS AT EARL RUSSELL'S
The meeting at Earl Russell's official residence on Friday was attended by 253 members of the House of

[illegible]

Mr GRAHAM spoke in favour of consolidating the two in committee.

Mr GLADSTONE, after playfully alluding to an opinion sometimes expressed, that an underground connection

storm warning, 25 per cent. prove to be wrong as regards the force, and 62 per cent. as regards the direction of wind. The committee recommend that the system of graphing the actual state of the weather at different times, and also the system of storm warnings, should be continued, with certain specified extensions and improvements; that the Meteorological Department should be

Ann Hall, the wife of the late, well-known and reputed husband, a man named Sweney, in getting the funeral expenses defrayed. The woman died on Friday morning, and at twelve o'clock on Saturday night, Sweney presented himself at the door of Mrs. Ann Hall, at Park, Liverpool, asking if "Ann lived there?" Mrs. Hall closed the door in his face, remarking "it was too late for any more." At length he gained admittance.

After some further conversation, Sweeney was told to proceed, and it was arranged that, in the morn-

these attacks on the character, conduct, and abilities of a member of Parliament for words spoken in Parliament ought not to be made by the leader of the House else-where than in Parliament itself. It is unworthy of the name of Mr. Gladstone to retail second-hand misrepresentation after it has been circulated by that portion of the press which advocates his views, especially when
