DOARS HEAD COTTE

WENZON'S SOOTHING SYRUP. It will relieve all kinds of infant suffering immediately. Perfectly safe. Pleasant to taste. It produces natural sleep, by relieving the child from pain, and cures colic, whooping cough, hiccups, and all other "chubby ailments." As bright as a button. It soothes the inflamed membrane of the throat, always relieves wind, regulates the bowels, and is known remedy for dysentery and diarrhea arising from anything or cold, or heat, or worms. Beware of cheap imitations. Medicine done up elsewhere at 1d. per bottle.

regularly inspected and kept in a wholesome condition. The public schools have been inspected, and orders given to the same efficient condition. The cotton

have saved 120 cubic yards of measure from being run into Hoxton bards, but they are inefficient in the disposal of the refuse. The refuse is taken into the main sewer, although the extemporized bed near the slag heap has intercepted a portion of the refuse from being swept into the river. The moving and collecting of the refuse is done by a small number of coolies and sinks, have been carried out more thoroughly and systematically than hitherto, and year by year the refuse is wearing a more sanitary aspect. The former sewerage was a source of much annoyance, and the new one submitted to me for examination in the course of the year, with the exception of a small portion of the refuse which had been exposed in the streets and the material deposited in the open air. The direction of it and the goos were pronounced fit for human consumption.

PUBLIC STREET IMPROVEMENTS.
About 200 local yards of new kerb and channel have been put down on the east side of Middle Street.

PRIVATE STREET IMPROVEMENTS.

I am, gentlemen,
Your obedient servant,
W. M. HARVEY, M.D.,
Medical Officer of Health,
Consett, March 28th, 1892.

Figure 1 displays a 10x10 grid of plots showing the evolution of the number of infected individuals over time for different parameter values. The columns represent the initial number of susceptible individuals (100, 90, 80, 70, 60, 50, 40, 30, 20, 10) and the rows represent the initial number of infected individuals (1, 2, 3, 4, 5, 6, 7, 8, 9, 10). Each plot shows a curve that starts at the initial infected count and decreases over time, eventually leveling off. The x-axis represents time (0 to 100) and the y-axis represents the number of infected individuals (0 to 100).

LANGLEY MOOR.—The juvenile missionary anniversary of the Methodist Episcopal church was celebrated on Sunday last, the services being conducted by Mr. W. Carlton, of Boyons. Large numbers were present, and a public meeting was held on Tuesday evening, presided over by Mr. Cook, Littleburn, and addressed by Messrs W. McColl, J. McColl, J. Tuley, and W. Robson.

THE SUNDERLAND MURDER.—Yesterday, Feb. 27, was charged at Durham Assizes, the case, before Judge Williams, of the murder of James Finimmon, at Sunderland, on Feb. 20th, 1889. The prisoner, after a deliberation of two hours returned a verdict of "guilty," and sentence of death was pronounced in the usual form.
