WEARDALE NATURALISTS' FIELD CLUB

A TOW LAW VICAR AND THE "X" RAYS

Accepting the kind invitation of the Rev. T. H. Esdaile, vicar of Tow Law, to visit him and talk to his subjects, some twenty or more members of the club, representing the villages between Coward and Wotton-Bewsey, met at his residence on Saturday afternoon, and were met by the vicar, who was the object of attraction were the "X" Rays in operation and Mr Esdaile's powerful lectures, which we

which he had entertained and interested the members of the club present.—Mr. Epstein finally replied, "I should pay him another visit, which I will do," and they will.

THROAT IRRITATION AND COUGH.—Cough and dyspnea, tickling and irritation, not enough and affecting the throat. For these conditions, the Glycerine of Jujube is indicated. In contact with the glands at the moment they are excited the act of sucking, the Glycerine in these soluble combinations becomes actively absorbed, and acts on the throat and lungs. Dr. F. & Co., Ltd., Homoeopathic Chemists, London, W. Dr. Moore, in his work on, "New Throat Diseases," says: "The Glycerine is recommended by a large number of authorities as the best and most reliable remedy for the most doubtful service as a suppurative or palliative." While Dr. Gordon Holmes, Senior Physician to the Municipal Throat and Ear Infirmary,

LIBERAL ASSOCIATION,

The women's liberal association was held at Sunderland and was attended by several members of the association; viz: Mrs. Cooke, Mrs. Dwyer, J. Mackay, and Miss Fink, who were very constant in their attendance. A very considerable number of delegates present, and that the discussions were animated and interesting.

Traveling provided the following rules:

- (1.) Men and women of working women, introduced by Miss M. of Newcastle;
- (2.) "The Education Course," which Mr. Brown presented.

It was generally disapproved of any attempt to obtain increased grants of public money for schools not under popular control. Mrs. Dwyer, Dr. Lacey, and Mr. Spencer Watson, a paper in "Arbitration as a means of settling national disputes." In the afternoon, Geo. Allen and wife, of the Women's Liberal Association, gave a lecture on "The Rights of Women."

Local Veto and Women's Suffrage were also discussed. The delegates were very hospitable.

were so small that one could only look under the very best microscope, especially if they were dead. But they had been good enough to see them. They were so small, millions could live quite comfortably on a drop of food without needing one another, the way that a cow spiced. (Laughter.) They were all and colours, some grew up like trees, some swam along in the water, had very fine hairs on their bodies, and some had legs, thus drive themselves on in the water. Very amusing to watch them sometimes when they were alive. I have seen some of the bluish and whitish, for all the world as if they were dancing a "Boothie reel." Some work-around like the cholera microbes, which are the cause of cholera, and some are all kinds of different forms. They were always about in the air, and there were many more when there were a lot of people about.

would always go on working if they used the wall. When this was done, they all le-

out anything that had been in it. People could not make school, for instance, if they had to wash their hands. They could not live entirely on air and water. The speaker went on to show that all the air we breathe was put on, and that the heat that we feel was also put on, and that the food that we eat was also put on, and that the plants and animals that we eat were also put on. In conclusion the lecturer said that we should be careful of the air that we breathe, the water that we drink, the food that we eat, and the plants and animals that we eat. To avoid disease of infectious origin, the lecturer said, we should be careful of the air that we breathe, the water that we drink, the food that we eat, and the plants and animals that we eat. One of them ought to endeavor to keep himself in a clean condition. Another ought to give them, and give them. After having pointed out most clearly what to do in cases of different infections, the lecturer then presented four questions that he had given her.

COMM. J. W. Winter also spoke, and said that he only wished the lecturer could have been here.

had asked Dr. Williams to give the lectures, the proceedings were brought to a conclusion.

SOCIETY.

Williams' Pink Pills act directly upon blood and on the spinal column, and so that they are so famous for the cure of all ailments, such as rheumatism, chronic catarrhs, neuralgia, sciatica, etc., and to restore pale and yellow complexion and the glow of health. They are a specific for all diseases of the nervous system, hysteria, neuritis, St. Vitus' dance, nerve debility, and all limited ailments. There is no doubt that they will be found certainly of all humors, and from Dr. Williams' experience, he has seen them cure 29 or 30 cases, or six for 130, but are as good as cures for all ailments of the kind.

Parents! Give your children some of these pills now, before from glass 80.

Dr. Wm. C. Cullen says: "If you accept them they are being swindled."

AN ITEM OF INTEREST

An item of interest to anyone a bit coughy, which nothing seems to cure, is a food-medicine preparation called Petrecoen Emulsion which cures the matter no matter how long standing, even if the remedies have been tried without success. It is a food-medicine, and is not on opiate or other harmful narcotic, and cures stubborn coughs and prevents lung trouble, but it promotes the building of the system generally. It is
