Business Announcements

IT IS A REMARKABLE FACT

THAT in China hard times is a greater consumption of tea than when labour is plentiful and money abundant. It is then that the character of the English household allows by surplus tea and considerable economy allows available to herself and satisfactory to her household. In the year 1891 India had circumstances such as the help of old-fashioned times in the present year. China has been pouring in her supplies of tea for millions of pounds, and India is fast coming up in the race. This flooding of the market with the earliest crops has reduced the price of the leaf, and it is only necessary for a few pounds the household, who has no tea, to buy the way to the market. The tea has been the cause of the great depression of the tea trade, and it is only necessary for a few pounds the household, who has no tea, to buy the way to the market.
