This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some faint smudges and discoloration, characteristic of old paper. On the right side, there is a dark, vertical binding strip, possibly made of leather or a different type of paper, which is part of the book's spine or cover. The overall lighting is even, highlighting the subtle variations in the paper's tone.

For the sake of the world—famed preachers for the cure of Cereb. Spinal, Spasms, Rheumatism, and all kinds of callous enlargements, have recently exerted on extensive premises in Mass. U.S.A., with a view to the manufacture of the blister in America, where it has already created a reputation; this has been rendered necessary, owing to the cheap and prohibitive duty on the importation into the States of the "THERIACUM," when imported from Europe, where we are informed, have undertaken the very stamping out the barbarous practice of "blistering," or applying the red line to the skin, and substituting in its place the more permanent cure by means of wonderful absorbent, which causes little, if any, pain to the patient, and leaves no mark or scar.

We wish them the same success in their undertaking in the States as they have achieved in England.
